GENERAL AWNING SYSTEM PLANNED ON FORT STREET

A steel awning, to cost \$2,000, to be added to the Odd Fellows' Building will cover a long felt want in rainy weather, providing a shelter for those who wait for cars. This awning is to be a part of a general awning scheme which will offer protection from both sun and rain for shoppers on the west side of Fort Street.

Elmer's new store has now been completed, so far as its exterior is concerned, and its beautiful grey and black front presents a most attractive appearance, which will be seen to much better advantage when the scaffolding around the other improvements that are being made on that side of the street can be removed.

Work on Hollister's drugstore and Day's grocery is going along at a sharp clip, and it is a matter of only a few days now when these places, too, will be adding to the epic and span perfection of that particular block in Fort Street.

A temptation to spend more than one's income is offered by the new show windows of the Manufacturers' Shoe Company, with rows on top of rows of beautiful new footwear set off by the marble frame of the windows.

Thrum's new windows are most artistic with their display of quaint pottery, which comes in all shapes, and in all the neutral shades, harmonizing perfectly with the window setting, illustrating the adaptability of this pottery to the furnishings of any room.

For two weeks Benson & Smith have had their windows filled with beautiful pieces of Parisian ivory, just the display needed first to bring out all the beauty of their new marble front.

Whitney & Marsh, too, are remembering the approaching Christmas season, and have filled their splendid new show windows with lovely gifts that tempt the shopper almost beyond her powers of endurance in the pursuit of economy.

Out at Waikiki the Moana Hotel is beginning once more to take on a finished look, one wing of the new structure being now practically completed, and work on the other wing promises to be nearing completion by the end of February, while at the other end of town, in Kalihi, the new telephone exchange is nearly finished, and the work of installing the batteries will begin within the next ten days.

RICE GROWN FROM SEED 1000 YEARS OLD SERVED MIKADO AT ARMY REVIEW

(By Associated Press)
TOKIO, Nov. — Rice grown directly from seed grains one thousand years old will be served the Emperor of Japan when he attends the autumn maneuvers of the Japanese army in Shiga prefecture, this fall. The ancient rice grains were found inside a wooden image of Vaisravana in a little Buddhist temple in the village of Iwame.

Vaisravana is the god of wealth, and his image had become so old as to need repairing. In the course of doing this there was found inside the image a flaxen bag containing the seed, and a paper with the following inscription in ancient Chinese characters:

"This image has been carved for the peace of the world. If any one of a later generation open it he should put in new seed." From the artistic style of the carving and the traditions relating to the image, it was estimated that the seeds were 1000 years old. They were planted and yielded a good crop.

REMEMBER THE NURSE.

As Christmas time draws nearer, And we prepare our box; And stuff, with bags of goodies, A little line of socks; We think with bitter sadness, Of all the carnage rife; When soldier faces soldier, And seek each other's life; We think of all the brave boys, Who've gone across the sea; To fight our country's battle, And uphold our liberty; We grant them every honor, By tongue, and song, and verse; But "over there" are others, How about the Red Cross nurse? When Sammie lies unconscious, Torn by shot and shell; Who nurses him so tender? Who strives to make him well? Who soothes his aching temples? As mother used to do? Who watches through the long night, And tries to "pull him through"? Others besides "Sammies" should Our Christmas spirit share; Let's try not to forget them— Our nurses "over there."
—TOM MERLE.

The bumper crop of potatoes in Germany has dwindled. The authorities overestimated the figures.

EASY TO RID HOME OF RATS AND MICE

There is no need of suffering from the depredations of rats and mice now that Stearns' Paste is readily obtainable at nearly every store. A small box of this effective exterminator costs but thirty-five cents and is usually sufficient to completely rid the house, store or barn of rats and mice. The U. S. government has bought thousands of pounds of Stearns' Paste for use in cities where rats and mice are plentiful. The Paste is also efficient in destroying cockroaches and waterbugs.—Adv.

KILAUEA CUTOFF ROAD PROPOSED

(Special Star-Bulletin Correspondence.)
HILO, Dec. 10.—In reference to the proposed cutoff road which has been outlined by County Engineer A. C. Wheeler and which is to shorten the way to the pit of Kilauea and incidentally to reduce the maintenance charges of some three thousand feet of roadbed, Supervisor E. H. Lyman went on record yesterday morning at the meeting of the solons to the effect that he did not approve of the cutoff.

"I feel that to make the cutoff would reduce the scenic effects for the tourists who ride down the road in automobiles," said Mr. Lyman. "The road was constructed to give the tourists a glimpse of the wonderful semi-tropical forest through which it winds. That scene is an asset and it should not be shortened, in my opinion."

Supervisor A. M. Cabrinha declared it would be better to make the cutoff. Tourists could follow the foot trail if they wanted to see more of Kilauea. He also said that the fact that, in time, the road would be made a permanent affair, seemed to be overlooked. When that time came, if the route were shorter by three thousand feet or so, there would be less road to construct.

The matter was left in abeyance as there is a lot of data to be gathered.

HILO MAY GET NEW ICE PLANT

(Special Star-Bulletin Correspondence.)
HILO, Dec. 10.—Hilo is to have another ice works if the plans of A. G. Curtis materialize. The Hawaii board of supervisors were approached through a communication from Mr. Curtis yesterday and were asked if they would sign an agreement to allow the new ice making company to secure water from the county mains in sufficient quantities to manufacture seven tons of ice per day.

The application of Mr. Curtis was referred to the members of the board from the first representative district, with instructions to investigate.

The new ice company, if started, will, it is claimed, supply ice to the Japanese fishermen who take considerable quantities each day for their sampans.

The new plant is to be established in Waialea at a point where the ice can be handled direct into the sampans and thus avoid hauling.

S. S. McCURE LECTURE BARRED.

RALEIGH, N. C.—S. S. McCure's lecture entitled "Road to Peace," which was to have been delivered shortly at the University of North Carolina, has been called off by the university authorities on the ground that it features the British as the chief obstacle to peace and is out of harmony with American ideals.

STARTLING RESULTS IN HONOLULU

People report incredible results from pure Lavoptik eye wash. A girl with weak, strained eyes was helped by one application. Her mother could not sew or read because of eye pains. In one week her trouble was gone. A small bottle Lavoptik is guaranteed to help EVERY CASE weak, strained or inflamed eyes. ONE WASH startles with its incredible results. Pure aluminum eye cup FREE. The Hollister Drug Company.—Adv.

Social Annoyance

From a hygienic standpoint social annoyance is getting serious, since the strain on both the body and the mind requires constant physical attention. Certainly nothing is more annoying to a refined person than offensive perspiration or body odors. Those who have used Tyree's Antiseptic Powder know it to be the one remedy which never disappoints. For general uses—dependable in all cases—it should be in every household.

Dr. M. E. Chantier, of the Faculté de Paris, France, said: "If there is a very unpleasant affection and hard to cure at that, it is surely these conditions." He also says: "There are to be found in the drug stores many preparations containing boracic acid and talcum. These preparations, generally used in a dried state, have the great inconvenience of clogging the pores of the skin. This is not the case with Tyree's Antiseptic Powder. As it acts as a deodorizing, stimulating agent. My attention was called to this fact while attending several cases of severe inflammation produced by Poison Oak. While no other remedy would give relief, Tyree's Antiseptic in the proportion of two teaspoonfuls to a pint of water allayed the intense pain in a comparatively short space of time."

This preparation is sold in boxes at twenty-five cents and one dollar, by the manufacturer, J. S. Tyree, Chemist, Inc., Washington, D. C.

OHIOANS STEAL COAL BOUND FOR OTHER DISTRICTS

The fuel administration has issued the following:

Wholesale coal robbery in Ohio has been unearthed by the United States fuel administration. In some places railroad tracks have been torn up, through freight stopped, and loaded coal cars confiscated. In other places cars of coal have been taken from sidings. The thefts have been directed by mayors and city officials of towns which have been allowed only enough coal for their immediate needs and where the people had become restive from seeing hundreds of coal trains go rattling through the state headed for lake ports and the Northwest.

This municipal robbery has not only disarranged shipping, but it has caused unnecessary hardships in other states and in other Ohio towns. An example of this was given by Homer H. Johnson, fuel administrator for Ohio.

Example of Confiscation
Four cars of coal were ordered to one town which needed fuel badly. The day it was scheduled to arrive trucks and wagons waited vainly at the station to unload the promised coal, a town just an hour's run down the line having stopped the train and confiscated all four cars for its own use. Much confusion was the result, as a supply for the second town was already on the road.

Most of the coal stolen, however, was on its way to Minnesota, the peninsula of Michigan, northern Wisconsin, and the Dakotas. The fuel administration is rushing thousands of cars of coal to these states by way of the Great Lakes in order to provision them for the winter before ice shuts down lake traffic, usually between the 1st and 10th of December.

It is an exciting game which the fuel administration is playing against time, as the coal which is not gotten into this territory by the lakes can not be sent in any other way, because the shortage of coal cars is so great that none can possibly be spared for the long haul to the Northwest.

The fears of the offending Ohio towns, that they would be left entirely without coal, were groundless, as the fuel administration has ordered that the immediate needs of Ohio and Michigan be supplied.

The progress that is being made by the newspapers and publishing concerns of Santo Domingo is shown by the fact that during the past few months six linotype machines of American manufacture were purchased.

How to Economize in Home Baking

Use
Royal Baking Powder
in Place of Eggs

In many recipes you will need only half as many eggs, in some none at all, if you use an additional quantity of Royal Baking Powder, about a teaspoon, in place of each egg omitted. The following tested recipe for rice bread is a practical illustration.

RICE BREAD

1 egg
1 1/2 cups milk
1 1/4 cups corn meal
4 teaspoons Royal Baking Powder
1 teaspoon salt
1 tablespoon shortening
1/2 cup boiled rice

DIRECTIONS—Beat egg until very light; add milk slowly; mix well. Add corn meal which has been sifted with baking powder and salt. Mix well and add melted shortening and the rice which has been pressed through a sieve. Bake in greased shallow pan in hot oven 30 minutes. Serve hot with plenty of butter.

The old method called for 2 eggs
